

ENERGY & WATER MANAGEMENT IN NYC: CHALLENGES & BUSINESS OPPORTUNITIES

EU TECHBRIDGE WEBINAR SERIES

 **Tuesday 15 December 2020**
h. 14.00 - 15.30 CET

Are you a SME offering innovative solutions in the energy and water sectors? Are you interested in business opportunities with actors from the North American Market?

Join this webinar to connect with major stakeholders of the New York Area! You will hear directly from them about their sustainability challenges, technology needs and approach to collaborating with innovative technology suppliers. You will have the opportunity to engage in a Q&A, and to apply to be selected for exclusive 1:1 meetings with the following end users:

Urban Systems urbs AB

<http://urbs.systems>

A true system integrator that is working with Hines to develop a future proof retrofit system solution for [Hudson Square Properties](#) in Manhattan, to exceed ambitious climate goals set by NY.

Technology needs:

- Energy reduction in buildings via thermal energy production and distribution
- Heat pumps
- Energy Storage
- Energy Distribution

ConEdison

<https://www.coned.com>

Energy utility in New York City, serving over 10 million customers with electricity, steam-based district heating and natural gas

Technology needs:

- Building envelope retrofits sensitive to preserving old buildings;
- Gas demand management & efficiency;
- Electrification of heating & cooling
- Integrated controls to improve heat pumps performance and utilization
- Real-time energy system monitoring in buildings

City of New York

Entities: Department of Citywide Administrative Services, Mayor's Office of Resiliency, Office of Sustainability, Department of Environmental Protection

Technology needs:

- Building health & energy performance
- Community energy
- Resource recovery
- Co-digestion of solid waste & energy production
- Distributed Green Infrastructure

DO YOU HAVE A SOLUTION FOR THEM?
