

Politecnico di Milano: Un nodo molto attivo della rete per l'idrogeno

Gianluca Valenti
Politecnico di Milano

Un progetto di:

THE HYDROGEN JOINT RESEARCH PARTNERSHIP

- The Hydrogen JRP is an industrial-Politecnico initiative that enables research on major transversal MULTI-COMPANY issues and supports the evolution of a hydrogen value chain in Italy
- The Hydrogen JRP is a **complementary tool** to the individual framework and collaboration agreements stipulated by companies with Politecnico and/or Fondazione Politecnico di Milano
- Thanks to the Hydrogen JRP it is possible to share research of interest, increasing its value and decreasing the impact of costs among the company participating to the initiative

Platinum Members

Gold Members

The Erasmus Mundus Joint Master on Hydrogen Systems and Enabling Technologies (HySET)

HySET is a dual Master degree program that trains already international students to be professionals and researchers with multidisciplinary knowledge in the hydrogen sector and related systems, experiencing a multicultural environment

Partners

Associate Partners

...and many other research activities

- Covering most aspects of the hydrogen infrastructure:
 - production from renewables and from fossils
 - transportation and distribution as pure and as organic liquids
 - storage in liquid phase, on solid materials and inside caverns
 - utilization in electrochemical and thermomechanical processes
 - transformation into synthetic fuels
 - verification of materials, systems, etc.
- Managed in the conventional manner of:
 - public projects
 - industrial collaboration

Industrial collaborations
