

# Welcome & Introduction to the SYSCHEMIQ project

Riccardo Bellato, President of LE2C

The project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement 101059909.

# Lombardy Energy Cleantech Cluster – LE2C

## MISSION

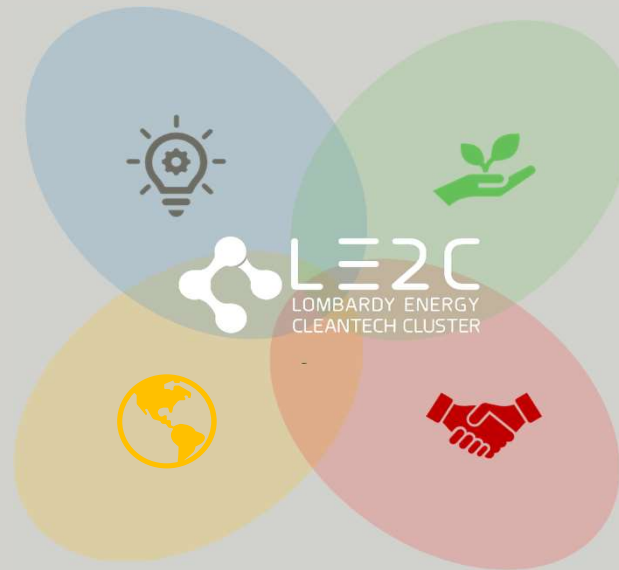

LE2C supports the growth, innovation and competitiveness of the Lombardy production system in the **Energy** and **Environment** sectors

It favours **technological innovation**

Promotes **internationalisation**

Strengthen the **Lombardy production system** by supporting the sustainability chain

Influences **regional, national** and **international policies**

LE2C facilitates the **creation of synergies and dialogue** between **companies** and **research centers**, promoting **innovation in the energy** and **environmental sectors**.

# Focus Areas

LE2C activities are organized into **6 focus areas**, each coordinated by at least one contact person from **research** and one from **industry**, to ensure an integrated approach and maximize impact on the ground:

**153**

**MEMBERS**

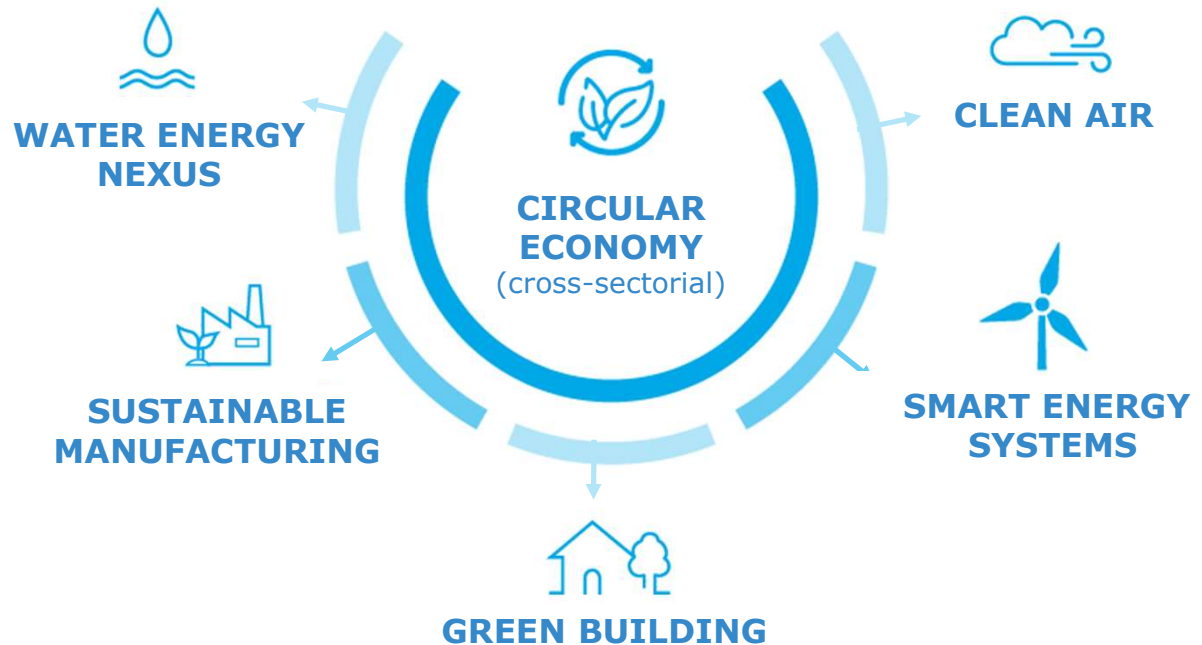

**116**  
companies

**11**  
research

**26**  
others

# Focus Areas

LE2C activities are organized into **6 focus areas**, each coordinated by at least one contact person from **research** and one from **industry**, to ensure an integrated approach and maximize impact on the ground:

## 153

### MEMBERS

**116**  
companies

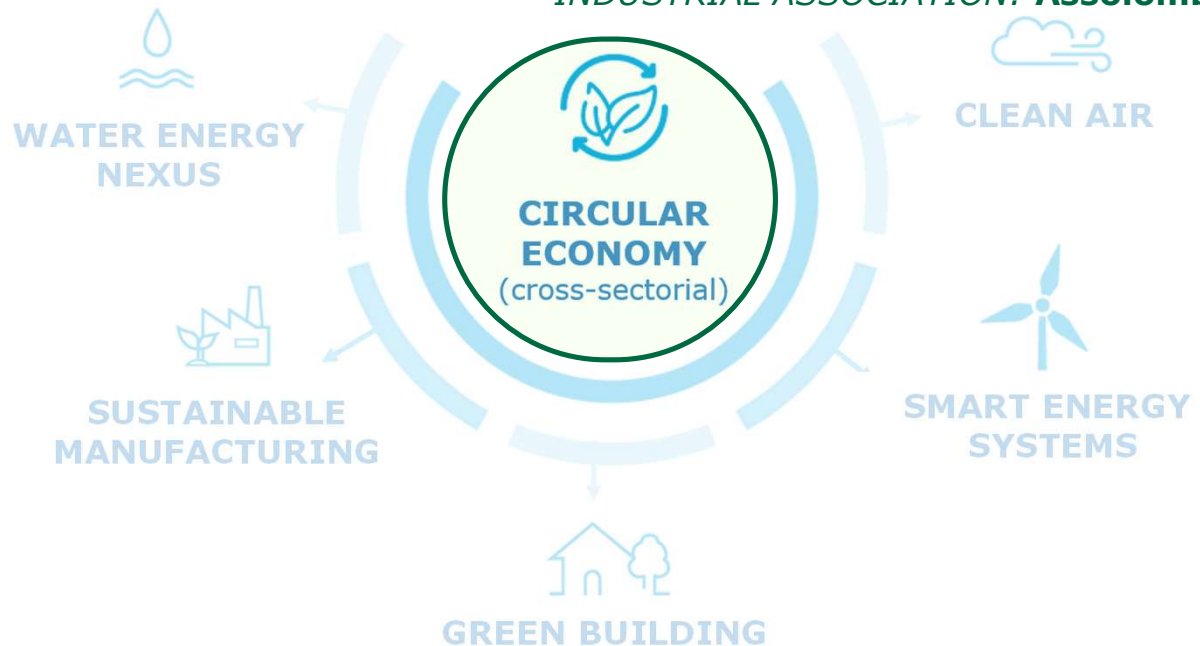

**11**  
research

**26**  
others

- *RESEARCH:* **INSTM e University of Brescia**
- *INDUSTRY:* **Nitrolchimica**
- *INDUSTRIAL ASSOCIATION:* **Assolombarda**

# LE2C ongoing projects

# Our role in the project

LE2C is involved in the **Work Package 8** "**Dissemination, Communication, Replication and Exploitation**".

Specifically, it will support the following tasks:

- **Promote replicability of the SYSCHEMIQ systemic model in the Lombardy Region** by organizing **workshops** and **webinars** to disseminate and share the **digital tools** and activities that will be developed within the project;
- **Create regional platforms that gather relevant stakeholders;**
- Collaborate in the production of communication materials.

# Partners

The consortium includes **21 partners** from five European Union countries (the Netherlands, Belgium, Germany, Switzerland and **Italy**) representing **industry, scientific institutes, education, public administration, cities and European networks.**

## Syschemiq projects

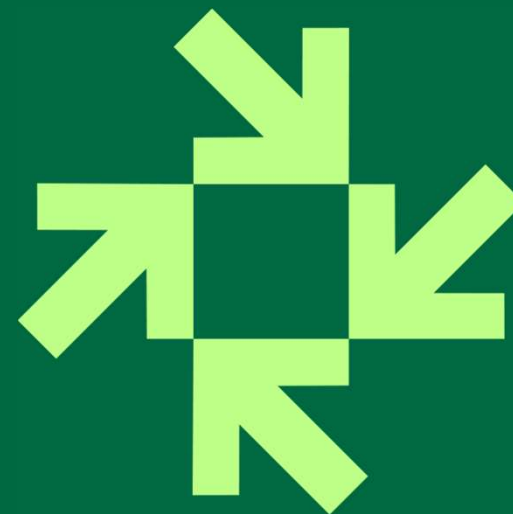

**Research Demonstration Project** (RDP) funded by the European Union's **Horizon Europe program**, with a budget of € 9.6 million. Duration: **48 months** (Sept 2022 - Sept 2026).

### GOAL

Facilitate the systemic transition to a **circular plastics economy** by increasing the **reuse of waste from plastic packaging**, promoting **new plastic collecting** and **disposal technologies**, and fostering the exchange of knowledge and best practices at the European level.

# Thank you for your attention!

 Via Pantano, 9 - 20122 Milano
