

Wednesday, March 18, 2026 | 10:30 AM - Online workshop

Consolidating Scenarios and Policy Implications for the Circular Economy of Plastics – TOK Workshop

About the workshop

The third Dual Track Governance (DTG) workshop represents the final DTG event coordinated by LE2C, together with POM Limburg, as part of the SYSCHEMIQ project, and focuses on the **transition of the plastics system towards a circular economy**. In particular, the workshop aims to stimulate a concrete discussion on how **public policies and technological innovation can**, and should, **evolve synergistically**.

The webinar will bring together **policymakers, stakeholders** and **project partners** from various regional and national contexts to encourage a multi-level and international dialogue on **plastics circularity**.

The workshop is designed to stimulate exchanges between regions, highlighting challenges, priorities, and governance needs linked to the plastics sector transition, contributing to the definition of shared, action-oriented strategies.

Program
